💼 Executive Summary

Innovative and detail-oriented B.Tech Artificial Intelligence and Data Science student with strong expertise in Java, Python, Node.js, and full-stack development. Experienced in building freelance projects, web and mobile applications, and scalable backend solutions with hands-on exposure to cloud, automation, and AI-driven applications. Founder of Frissco Digital Ventures, with proven ability to deliver creative software solutions aligned with real-world needs.

🎓 Education

B.Tech in Artificial Intelligence & Data Science
Rajalakshmi Institute of Technology, Chennai
2024 – 2028 (Expected)

🛠️ Technical Skills

- **Programming Languages**: Java, Python, C, JavaScript
- **Frameworks & Tools**: Node.js, Express, Flutter, Android (Java), Flask
- **Databases**: MySQL, MongoDB, Firebase
- **Others**: Git/GitHub, Docker, REST APIs, Cloud Platforms

👨‍💻 Experience

Founder – *Frissco Digital Ventures* | 2023 – Present
- Built and managed projects under *Frissco Media Group* including software development and freelancing services.
- Delivered end-to-end software products for clients while leading product innovation.
- Worked on healthcare, education, and digital business transformation projects.

Freelance Software Developer | 2022 – Present
• Developed custom web, mobile, and backend applications for diverse clients.
• Notable work includes e-commerce dashboards, digital healthcare solutions, and educational platforms.

Projects

ShOS – Shell & Operating System | C, Assembly (NASM), QEMU

Built an educational operating system from scratch featuring a protected-mode kernel, custom bootloader, VGA text mode display, PS/2 keyboard driver, and shell with 20+ built-in commands including history, tab completion, text editor, Tic Tac Toe, and a calculator.

- Implemented **memory management routines** including segmentation and paging for efficient resource handling.
- Designed a **custom command interpreter** with modular architecture, making it easy to extend and add new commands.

Vaultlyn Vault – Symmetric Encryption Vault | Python, Cryptography

Developed a CLI encryption tool for secure offline file storage. Features include nominee login (up to two nominees), cross-platform supper (Windows/Linux), and robust symmetric key encryption for enhanced privacy. Also an android GUI application with decentralized bare-metal encryption on device.

- Integrated **configurable encryption workflows** to support different file handling needs (text, media, documents).
- Added **cross-platform automation scripts** (Bash & Batch) for seamless usage on both Linux and Windows.

Campora OSS – Institution Management System | JavaScript, Dart, C++

Developed a comprehensive **software bundle for educational institutions,** integrating academic, administrative, and campus management into a unified platform. Designed to improve efficiency, transparency, and digital adaptation across multiple stakeholders.

- Built **modular applications** for students, faculty, canteen, transportation, and campus shops with seamless integration.

- Implemented a **scalable architecture** enabling deployment across institutions with customizable modules.

Moves – Quick Commerce Medicine Delivery Service | Node.js, Express, MongoDB

Developed a **full-stack quick-commerce medicine delivery application** aimed at digitalizing prescription and medical supply distribution. Designed to provide patients with a seamless platform search, order, and manage medicines while enabling admins to oversee inventory and orders efficiently.

- Built a **searchable medicine catalog with detailed product view, cart system, and secure checkout flow.**
- Designed an **admin dashboard** for managing medicines, tracking orders, and automating database updates.
- This project was selected as one of the 6 finalists in **Infosys TechZooka Innovation Summit Hackathon 2024.**

🏆 Certificates & Achievements

- Participant – Google Solution Challenge Hackathon 2025
- Finalist – Infosys TechZooka Innovation Summit Hackathon 2024
- Earned **MongoDB Schema Design patterns and Antipatterns Skill badge, Vector Search Fundamentals, RAG with MongoDB, and MongoDB Basics for Students**
- Built a Raspberry Pi-based **company server** for hosting internal apps and services.
- Active contributor to **open-source projects on GitHub.**
